

## WOMENS BG REQUIRMENTS

I know a lot of women have really long hair right now but its extremely hard to make that work for the 1940's. Around shoulder length is the best for us and the most adaptable to 1940's styles. Shorter than that is ok also but anything thats bra strap length or longer becomes hard to make look period and there are only so many ways to cheat it to hide the length which means all those with too long of hair end up having the same hairstyle which I would also like to avoid having to do. Below are examples of hair lengths that are appropriate for us including some that are the longest that we can work with easily to expedite the process in the morning and also not to have to wig anyone due to budget concerns. That having been said, a few long heads of hair are ok as long as they aren't all one length ( if there are some shorter layers around the front its easier to cheat the style)

Also, please women normal hair colors, no weird crayola colors, no long dark roots on blonde hair (that Malibu look thats so popular now) any woman thats hired should know to have her roots touched up before she works, and no crazy half shaved heads or asymmetrical haircut
